Incentives Work: Getting Teachers to Come to School

American Economic Review

Vol. 102 No. 4, June 2012

Esther Duflo
Rema Hanna
Stephen P. Ryan

There are two typos in the paper. First, the $\epsilon_{t,m+1}$ in equations (5) and (6) should be $\epsilon_{t+1,m}$ and should be $\epsilon_{0,m+1}$ in equation in (7). Second, the log likelihood's in equations (9) and (11) should be sums of log probabilities, instead of sums of probabilities. The second half of equation 11 should be $(1-w_{imt}) \ln [1 - \Pr(\dots)]$.
