## **Can Electronic Procurement Improve Infrastructure Provision? Evidence from Public Works in India and Indonesia**

### **Disclosure Statement for Benjamin A. Olken**

This project received financial support from the International Growth Centre (IGC), based at the LSE and Oxford and supported by the UK DfID.

I receive other research grants from the IGC (primarily supporting my work on property tax reform in Pakistan), and the Abdul Latif Jameel Poverty Action Lab, which I co-direct, receives other grants from DfID, primarily to support work on governance issues in developing countries. However, none of those grants are directly connected to this research.

No one had the right to review this manuscript prior to circulation.
