

## Disclosure Statement for “SOME PRINCIPLES FOR REGULATING CYBER RISK”

I have worked on this article while being employed by the Bank of England. I am a member of the Financial Policy Committee (FPC) of the Bank. The FPC and its interest in these issues are discussed in the paper. I also received research support from the Alfred P. Sloan Foundation to the Macro Financial Modeling (MFM) project at the University of Chicago and by the Chicago Booth Initiative on Global Markets and Fama-Miller Center.

In line with the Bank of England’s general communications guidance for work coauthored by policy committee members, the paper has been circulated to members of the Financial Stability Committee for an opportunity to comment ahead of its publication. However, all views expressed in this article are the authors’ views and do not necessarily reflect those of the Bank of England or its policy committees.
