

Disclosure statement for Daniel Sacks, “Using Non-Linear Budget Sets to Estimate Extensive Margin Responses: Evidence and Method from the Earnings Test.”

This research was supported by the U.S. Social Security Administration through grant #RRC08098400-06-00 to the National Bureau of Economic Research as part of the SSA Retirement Research Consortium and by grant #G-2015-14005 from the Alfred P. Sloan Foundation. The findings and conclusions expressed are solely those of the authors and do not represent the views of SSA, any agency of the Federal Government, or the NBER. The research was also supported by the UC Berkeley Institute for Research on Labor and Employment, UC Berkeley Center on Governing and Investing for the Future, and UC Berkeley Burch Center.

I have no other relevant or material financial interests that relate to the research described in this paper.

IRB approval was not obtained for this study as the nature of the data used for the study render the project exempt.
