

Disclosure Statement for Local Ties in Spatial Equilibrium

Mike Zabek

June 7, 2023

The paper contains one figure using non-public data from the US Census Bureau and the US Social Security Administration. Results using these data were reviewed to ensure respondent confidentiality.

I know of no relevant financial interests to disclose. The research was supported in part by a NICHD center grant (R24 HD041028) to the Population Studies Center at the University of Michigan, through a Rackham Graduate School pre-doctoral grant, and through computational resources provided by Advanced Research Computing at the University of Michigan and the BigTex High Performance Computing Group at the Federal Reserve Bank of Dallas. I am employed by the Federal Reserve Board, so I received salary, research time, and some research resources while revising it.

No IRB approval was necessary for this project, as it contains only secondary data analysis.
