

Disclosure Statement

This research project, entitled “STEM Summer Programs for Underrepresented Youth Increase STEM Degrees,” received financial support from the Alfred P. Sloan Foundation, the Teachers College Provost's Investment Fund, the National Center for Institutional Diversity at the University of Michigan, the Lab for Economic Applications and Policy at Harvard University, and the National Science Foundation (award #1260898). Silvia Robles received support from a Ford Foundation pre-doctoral fellowship and the National Science Foundation graduate research fellowship. The National Bureau of Economic Research; Teachers College, Columbia University; Blueprint Labs; Harvard University; and the University of Michigan all provided institutional support. This study is registered in the AEA RCT Registry and the identifying number is: AEARCTR-0002888.

I, Silvia Robles, have not held any paid or unpaid positions at any relevant organizations that would pose a conflict of interest to this paper. I declare that I have no relevant or material financial interests that relate to this paper.

The Host Institution (HI) had a right to review this article prior to circulation to ensure that no individual's identifiable information was disclosed and the HI exercised that right.

The authors obtained Institutional Review Board (IRB) approvals for this project from NBER, Harvard University, Teachers College Columbia University, and the Host Institution.
