Marie Connolly, UQAM / CJE Data Editor
Topic: Reproducibility from Day 1

Journals require that you share your code and data in a replication package upon acceptance. However, efficient reproducibility starts at the beginning of the research project. Following some best practices can not only help you prepare a replication package later, but also make you a more productive researcher. In this workshop, we start with an empty folder and demonstrate methods to keep your project reproducible from Day 1.

Topic: Advanced methods for self-verification of reproducibility

Data editors describe possible steps to self-check replication packages before submitting them to a journal. It is not meant to be exhaustive, and it is not meant to be prescriptive. There are many ways to construct a replication package, and many more to check that it works. Questions from the audience are encouraged. Participants are encouraged to also attend Tutorial 1.

Over four decades as a professional economist, William (Bill) Spriggs made significant contributions to labor economics, economic policy, and the practice of economics research and training. He passed away in June 2023, while actively continuing his work in all three wide-ranging domains. This luncheon plenary is part of a mini-consortium celebrating Bill's contributions and achievements. We also recommend that you attend "Labor Markets and Education: Papers in the Bill Spriggs Research and Policy Tradition".
