## American Economic Association Universal Academic Questionnaire Summary Statistics

This report contains information from the 2007 Universal Academic Questionnaire (UAQ), an annual survey of US economics departments. A survey is sent to each institution, addressed to the chair of the Department of Economics. Responses apply only to that department. Economists employed in other academic units are not included in the survey. We try to maintain the confidentiality of individual institutions' responses. The accuracy and scope of these
tables depend on the cooperation of departments in completing the UAQ. The 2008 questionnaire will be mailed in October. Table A data are from the annual US government-supported Survey of Earned Doctorates for 2006.

Notes: Salaries are means of institutional means; not all institutions report at each rank every year; individual faculty move among ranks from year to year. Includes salaries of faculty on leave; excludes visiting faculty. Calendar year salaries converted to academic year by multiplying by 0.818 . Standard deviations are in brackets.

Table 3-Employment Conditions for New Assistant Professors Holding PhD, 2007-08 (Means of reporting institutions: Number reporting in parentheses)

|  | Salary | Additional <br> compensation | Teaching load <br> (courses per year) |
| :--- | :---: | :---: | :---: |
| PhD institutions | $\$ 91,817(40)$ | $\$ 37,444(27)$ | $3.4(35)$ |
| MA institutions | $[\$ 13,472]$ | $\$ 28,621]$ | $[1.0]$ |
|  | $\$ 73,306(24)$ | $\$ 20,449(13)$ | $4.8(24)$ |

|  | $\$ 65,596(34)$ | $\$ 10,243(9)$ | $6.1(40)$ |

Notes: Some institutions hired more than one new assistant professor; thus, means cover more persons than institutions, but are not weighted by number of new hires. Standard deviations are in brackets.
${ }^{\text {a }}$ Includes guaranteed summer compensation (over all years) and other compensation of cash value to employees, such as a signing bonus. Does not include fringe benefits, moving expenses, or computer that remains the property of the institution.

${ }^{\text {a }}$ Categories do not sum to 100 percent because some categories are not reported. In 2006, the racial/ethnic breakdown of all economics doctorate recipients was: 34.8 percent Asian; 3 percent black; 9.6 percent Hispanic; 42.9 percent white; 9.5 percent other/unknown (includes American Indian and multiple races).
${ }^{\mathrm{b}}$ Includes only respondents with definite employment plans. Other and unknown are not reported.
${ }^{\mathrm{c}}$ Includes two-year and foreign colleges and universities, medical schools, and elementary/secondary schools.
${ }^{\text {d }}$ Before 1970, fellowships were counted under primary employment activity. These cases have been removed from the percentages.
