

To the Editor,

December 18, 2021

Disclosure Statement for the manuscript “Child Care Subsidies and Child Skill Accumulation in One- and Two-Parent Families”—Answers to specific items listed in the AEA disclosure policy:

- 1. Every submitted article should state the sources of financial support for the particular research it describes. If none, that fact should be stated.**

A major portion of the research reported in this paper was performed while I was a research assistant at the Federal Reserve Bank of Minneapolis while simultaneously pursuing my graduate studies at the University of Minnesota. I did not receive direct support for this project from the Minneapolis Fed, however.

- 2. Each author of a submitted article should identify each interested party from whom he or she has received significant financial support, summing to at least \$10,000 in the past three years, in the form of consultant fees, retainers, grants and the like. The disclosure requirement also includes in-kind support, such as providing access to data. If the support in question comes with a non-disclosure obligation, that fact should be stated, along with as much information as the obligation permits. If there are no such sources of funds, that fact should be stated explicitly. An “interested” party is any individual, group, or organization that has a financial, ideological, or political stake related to the article.**

I have nothing to disclose.

- 3. Each author should disclose any paid or unpaid positions as officer, director, or board member of relevant non-profit organizations or profit-making entities. A “relevant” organization is one whose policy positions, goals, or financial interests relate to the article.**

I have nothing to disclose.

- 4. The disclosures required above apply to any close relative or partner of any author.**

I have nothing to disclose.

- 5. Each author must disclose if another party had the right to review the paper prior to its circulation.**

In this paper I make extensive use of the Early Childhood Education Study, Birth Cohort (ECLS-B), a restricted-use survey from the U.S. Department of Education. As per the National Center for Education Statistics (NCES) policies, the tables and sample counts which use ECLS-B data had to be submitted for review and approval to the NCES.

Sincerely,

Emily G. Moschini
