

Program Files used to generate main figures and tables in “Upstream and Downstream Impacts of College Merit-Based Financial Aid for Low-Income Students: *Ser Pilo Paga* in Colombia”, *American Economic Journal: Economic Policy*, by Juliana Londoño-Vélez, Catherine Rodríguez and Fabio Sánchez

Datasets:

- data_RD.dta contains information of Fall 2013 (placebo) and Fall 2014 test-takers, including standardized high school exit test performance, household SISBEN wealth index, and baseline controls. This dataset is used to produce the regression discontinuity figures and tables.
- data_DD.dta contains information of all test-takers (Spring and Fall cohorts) between 2011 and 2016, including standardized high school exit test performance, and postsecondary enrollment. This dataset is used to produce the difference-in-differences figures.

Stata code:

- F1.do generates Figure 1.
- F3_F4_F6_F8.do generates Figures 3, 4, 6 and 8.
- F5.do generates Figure 5.
- F7.do generates Figure 7.
- F9_F10_F11_F12.do generates Figures 9, 10, 11 and 12.
- F13.do generates Figure 13.
- T1.do generates Table 1.
- T2.do generates Table 2.
